

ALEXANDROS ANTONOV

Senior Software Engineer, Ph.D. Candidate

- @ aantonov@hotmail.gr
- **J** +30
- Athens, Greece

- in Alex Antonov
- AAlexandros

TECH STACK

Groovy

Java Python

C++ C C#

Solidity | javascript

Bash/PowerShell Scripts

HTML) (CSS

MySQL PostgreSQL

MongoDB (Git) SVN

Gradle Maven

React.js web3.js

Angular Apache Wicket

REST/SOAP Web Services

IBM API Connect

Microsoft Azure

Websphere Application Server

Apache Tomcat

Truffle Suite

Apache Camel | Jira

Linux | Apache Hadoop

Apache Spark | gnuplot

ABOUT ME

During my 7 years of work in Industry and Academia, I've cultivated a dual passion: crafting well designed, thoroughly tested, and properly implemented large-scale systems while conducting profound evaluations and comparisons with the state of the art, pushing the boundaries of innovation.

EXPERIENCE

Software Engineer | Interamerican | Digital Solutions Department

1 2016-2020

- Athens, Greece
- System Modeling (Problem Analysis, Usecase/Function Flow Diagrams, Architecture Design).
- Implementation (Back-End/UI Development, Database Management).
- Test Driven Development (Unit/End-to-End/Regression/Integration Testing).
- Communication with key stakeholders to develop optimal solutions based on client needs.
- Operating in a self-organized team, managing task estimations, and fulfilling Scrum Master duties within agile methodologies.
- Conducting R&D for technologies that meet department needs.
- Training and mentoring new team members.

EDUCATION

Ph.D. Candidate in Computer Science | Athens University of Economics and Business

2021 - Ongoing

Athens, Greece

Thesis: Dependable Network Overlays for Blockchain Systems Fields: Blockchains, Peer-to-Peer Networks, Distributed Systems

OTHER SKILLS

Teamwork

Time Management

Problem Solving

Multitasking Training

Critical Thinking

Presenting

Attention to Detail

Certified Scrum Master (PSM I)

M.Sc. in Computer Science | Athens University of Economics and Business

1 2020-2021

Athens, Greece

GPA: 9.33

B.Sc. in Computer Science | Athens University of Economics and Business

2011-2016

Athens, Greece

Specializations: Information Systems and Security, Computer Systems and Networks GPA: 7.1

LANGUAGES

English: Proficiency Certifi-

cate (C2)

Greek: Native Speaker

Russian: Native Speaker

PUBLICATIONS

SecureCyclon: Dependable Peer Sampling | ICDCS 2023

Establishes a mechanism for sampling a set of pseudo-random peers in a P2P overlay, designed to withstand malicious actions. Funded by IOHK, the company behind the Cardano blockchain.

PROJECTS

Crypto Games | 😯

Developed two blockchain-based games: the popular SOS game with a focus on user experience, and a simple dice game designed to counteract malicious behavior. Both games are comprised of a Solidity smart contract and a React-based web interface, integrated using web3.js.

Bloom Filter-Based Multicast for Information Centric Networks

Implemented a prototype infrastructure utilizing the Publish/Subscribe paradigm to offer an alternative to network-layer multicast. Developed within the European project "Point: iP Over IcN - the betTer ip".

Social Network Recommendation

Analyzed a real social network dataset to optimize item recommendations. Explored network diffusion to maximize the weighted sum of item outreach and average user ratings.
